

REDSTAR

RED

RELEASE

7-0-015S

RED RELEASE was designed as a Nitrogen, Sulfur and Microbial Supplement for spring UAN broadcast and sidedress applications.

FEATURES

- Help increase the breakdown of crop residues
- Releases nutrients back to the soil for this year's crop.

Crop residue contains nutrients which are a valuable asset to a grower's fertility program. University of Nebraska research shows each ton of dry harvested corn residue contains 17 lbs Nitrogen, 4 lbs Phosphorus, 34 lbs Potassium and 3 lbs Sulfur. Releasing these key nutrients back to the soil helps reduce fertilizer costs and increase crop health and yield.

BENEFITS

- Excellent source of Nitrogen, Sulfur and biological to blend with UAN.
- Increases residue breakdown and release of all nutrients back to the soil.
- Stimulates early growth and improves plant health by helping keep nitrogen in the ammonium form.
- Optimizes breakdown of crop residue by improving soil microbial activity.

APPLICATION

- Apply 1-2 gallons / acre (Standard rate 1 gallon / acre)
- Rate: 1 gal. / Acre.
