

REDSTAR **MAXXUM-STAR+**

Maxxum-Star + with V-Star Technology is a low-salt starter fertilizer designed specifically for in-furrow application to Corn and Soybeans for improved early season growth and vigor. High yielding corn and soybeans require readily available nitrogen, phosphorus, potassium, manganese and zinc from germination through V3 to set-up superior plant health and maximum development season long. Maxxum-Star+ utilizes 2 carbon sources to feed soil microbes to maximize their early season activity to release nutrients. These carbon sources also work to help improve the uptake of the fertilizer in Maxxum-Star+ for increased early root and shoot growth. Finally, our V-STAR Technology works to stimulate increased root growth and development while keeping nutrients more plant available. V-STAR Technology is the same technology utilized by soil labs to extract nutrients, which means MAXXUM-STAR+ keeps nutrients available longer for maximum crop development. V-Star Technology is also provides energy to plants encouraging additional root growth in developing plants to help maximize nutrient access from the soil.

Why choose Maxxum-Star+ as your Starter fertilizer?

- < Provides an immediate supply of NPK, micro-nutrients and microbial stimulation to encourage uniform growth and development.
- < V-Star Technology reduces fertilizer tie-up and increases nutrient availability
- < In-furrow Maxxum-Star+ work to stimulate early season growth so your crop will mature quicker, providing drier grain at harvest which saves additional driering cost.
- < Maxxum-Star+ maximizes crop emergence and uniformity early in the spring. Corn that emerges in the same 24 hour period has shown to have up to 15% increase yield potential.

UNIFORM STANDS CAN INCREASE YIELD AS MUCH AS 15%

AVERAGE YIELD OF 205 BUSHELS / ACRE

15% = 30.75 bushels per Acre ($\$4.00 \times 30.75 = \$123.00 / A$)

10% = 20.5 bushels per Acre ($\$4.00 \times 20.5 = \$82.00 / A$)

5% = 10.25 bushels per Acre ($\$4.00 \times 10.25 = \$41.00 / A$)

Getting your crop off to its best start is instrumental in the success of your farm. Maxxum-Star+ has earned the REDSTAR BRANDED PROVEN status because year after year it provides PROVEN yield success in our Red Acres R&D plots compared to not applying Starter fertilizer.
